Subject: FW: NIST Telecon with Dr. O'Toole

b6

NIST is a little concerned about the USA Today op ed. [REDACTED] the director of NIST, just called Tara and offered the following clarifications:

- NIST does not do product testing
- NIST did not test AIT machines for safety
- NIST measured the dose of a single machine and compared it against the standard

He said he's not looking for corrections, just doesn't want any mischaracterization of their work continued. I attached a fact sheet that they cleared on from a while ago.
